

# AICO *Card-Lite*\* INSERTABLE GUIDES OF "RIP-PROOF" MYLAR†

Patent Pending

so thin they save up to 35" card file space per 1000 guides

Made entirely of Mylar film, AICO Card-Lite Guides have less than  $\frac{1}{3}$  the bulk of conventional card guides. *This saves from 19" to 35" file space per M guides.* 1" file space will accommodate 90 Card-Lite Guides while only 30 conventional guides can be filed in the same 1" space. Thus users gain space for at least 2400 additional file cards with every 1000 guides used.

1000 bulky conventional guides require 46" file space (approx.)

1000 Card-Lite Guides require only 11" space

so strong they're guaranteed never to tear, crack, or shatter!

50 times stronger than conventional card guides, AICO Card-Lite Guides are virtually indestructible. Yet they spring-flex with finger pressure to enable easier filing and retrieval. They last many times longer than any other card file guide, saving the cost of new guides and replacement time.

with blank inserts...stock-title printed inserts...or special-title inserts

AICO Card-Lite Guides have transparent insert-style tabs and are furnished with blank white inserts to permit typing your own tab titles. Stock-title printed inserts are also available, (see right). Special-title printed inserts will be quoted on request.

#### Stock-title printed inserts:
